Percentage: 81.80%

INTERNSHIP

Java Development Intern, March 2024 - May 2024
WebDroid Edutech, Nagpur

- Received comprehensive training in Core Java and Advanced Java, covering essential programming concepts and object-oriented principles.
- Worked on a full-stack Java project, developing a web application using Java for the backend and an SQL database for data storage.

PROJECTS

Smart Personal Item Tracer with Mobile App Integration Ongoing

- Developing a solar-powered tracking device with Wi-Fi, reverse action, and offline functionality, enabling real-time, multi-device monitoring for enhanced security.

Blood Bank Management System March 2024 - May 2024

- Developed a Java application with an SQL database for hospitals and patients to manage blood donors, search for donors, check stock, and update inventory.
- Project link: [Blood-bank-management-system](#)

Portfolio

- Designed and developed a personal portfolio website to showcase skills, projects, and achievements. Built with a user-friendly interface highlighting expertise in web development and project presentation.
- Project link: [My-Portfolio](#)

SKILLS

Java, and Basics of C++, HTML, CSS
